

MUSIC AND MOVEMENT IN AN EARLY LEARNING SETTING

NANCY CEULEMANS

This workshop is designed to inspire you with new playful ideas for doing "music and movement" in an early learning setting. It explains the theory of how music and movement helps to develop the brain and how this information can be used while working with children of different age groups (under 3 year olds, 4 year olds and 5 year olds). Through the many hands-on moments you will learn new play ideas, new songs, use simple materials in creative ways and have lots of FUN.

Originally from Belgium, Nancy Ceulemans moved to Nova Scotia in 2008. Nancy first studied classical music and in 1989 also obtained a teachers degree (with honors) with an emphasis on Early Childhood Development and Education. For ten years, Nancy was the director and teacher of a pre-school and later became a practicum mentor for students in pre-school nursing. Nancy further developed her career internationally in a variety of educational settings in England and Switzerland. She was involved in toddler groups, taught preschools, primary classes and taught music and movement in preschool and elementary years. Over the past 10 years Nancy specialized in award winning approaches to help individuals overcome their difficulties in a daily life functioning. She runs a clinic in Hammonds Plains and teaches courses and workshops locally and abroad. In her workshops, she integrates her knowledge and experience gathered from her diverse array of training. .
