Leaders will develop the skills and mindsets that can enhance their performance, deepen their understanding of facilitation and effect organizational change.

Deepening our Roles as Leaders in the Classroom-Growing a Culture of Reflective Practice

This full day session will take participants on a journey to deepen their understanding of our roles in supporting the foundations for learning. Educators will work in small learning communities to engage in dialogue around our image of children, the powerful role will play in building relationships, designing environments and experiences for children, and considering classroom research as a place to grow documentation and forward our work. This exciting session will inspire each of us to grow ourselves as leaders and to build the kind of community that we desire for our children, our families and ourselves.
